

The last two years of the no call list program was the best thing that could have been done for wisconsin residential phone customers. It has been enjoyable to sit down and eat supper without the phone ringing 15-20 times in 1 hour!. If the no call list would not have been designed as it currently is I would not have a land line phone today. If telemarketers start calling again I will discontinue our phone services and use a celluar phone. Please "do not" change the regulation, If we want to purchase something we will call them.
